KARA NAWZAD HASSAN

Communication Engineer

Sulaymaniyah, Kurdistan, Iraq | karanawzad01@gmail.com | +964 773 137 0123

LinkedIn: linkedin.com/in/kara-nawzad | GitHub: github.com/kara-nawzad

PROFESSIONAL SUMMARY

Communication Engineering graduate with hands-on experience in telecom operations, machine-learning antenna design, and building network tools that make complex systems easy to understand and manage.

EDUCATION

B.Sc. in Communication Engineering | 2022 – 2026
Technical College of Engineering, Sulaymaniyah Polytechnic University

INTERNSHIPS & TECHNICAL TRAININGS

Service Operation Center (SOC) | July 2026 – August 2026
Asiacell Company – Sulaymaniyah, Iraq

- Monitored company-wide network health and service performance to keep services running without interruption.

DTI Course Participant (Digital Transformation) | Summer 2025
FH Münster University of Applied Sciences – Münster, Germany

- Completed a two-week technical course on digital transformation in an international academic environment.

Telecom Engineering Intern | July 2025 – August 2025
Halabja Group Telecom Services (HTS) – Sulaymaniyah, Iraq

- Assisted with network maintenance and learned real site operations alongside senior engineers.

PROJECTS | They're all live – come try them out! karanawzad.tech

FiberLAB – Fiber Internet Network Design & Training Tool

- An interactive tool for designing a fiber internet network, from the central equipment to the customer's home, with virtual testing tools to practice finding and fixing faults.

SuliNOC – AI-Powered Network Operations Center

- A live dashboard that monitors a mobile network and uses AI to catch early warning signs, so problems are fixed before customers notice.

AntDesigner – AI Antenna Design Tool | Graduation Project

- An AI model trained on 6,048 simulations that designs an antenna in 3 seconds with 94.76% accuracy, instead of hours of manual work.

KurdLine – Kurdistan Network Planning Platform | In Development

- A planning platform that combines fiber, microwave links, satellites and 5G to keep Kurdistan connected across difficult terrain.

VOLUNTEER EXPERIENCES

Volunteer | 2024 – 2026
Career Development Center (CDC) — Sulaimani Polytechnic University

- Helped organize career programs, workshops, and networking events connecting students with the job market.

Administration Staff | 2025 – 2026
Rowad Leadership Course

- Managed logistics and coordinated schedules and communication between students and instructors.

TECHNICAL SKILLS

- **Engineering Software:** AutoCAD, MATLAB, CST Microwave Studio.
- **Programming & AI:** Python (TensorFlow, Keras, Pandas, NumPy), Machine Learning.
- **Software & Digital Tools:** MS Office (Word, Excel, PowerPoint, Outlook), Social Media & Community Management

LANGUAGES

- **Kurdish:** Native | **English:** Fluent | **Arabic:** Advanced (Comprehension), Intermediate (Speaking)
