KARA NAWZAD HASSAN

Telecom Engineer

Sulaymaniyah, Kurdistan, Iraq | +964 773 137 0123 | karanawzad01@gmail.com

Live projects you can try: karanawzad.tech | GitHub: kara-nawzad | LinkedIn: kara-nawzad

PROFESSIONAL SUMMARY

Telecom Engineering graduate (B.Sc. Communication Engineering, 2026) with internship experience in network operations at Asiacell and HTS. Built five live, interactive engineering platforms covering AI-powered network monitoring and fault prediction, antenna design, fiber-optic (FTTH) network design, and telecom tower planning. Skilled in Python, machine learning, RF, and fiber-optic design; seeking a Telecom / Network Engineer role applying AI to real-world network challenges.

EDUCATION

B.Sc. in Communication Engineering | Technical College of Engineering, Sulaymaniyah Polytechnic University 2022 – 2026

INTERNSHIPS & PROFESSIONAL EXPERIENCE

SOC Intern | Asiacell Company, Sulaymaniyah, Iraq 2026 (2 months)

- Gained hands-on exposure to **live network operations** within the SOC of Asiacell, one of Iraq's largest mobile operators.

Telecom Engineering Intern | Halabja Group Telecom Services (HTS), Sulaymaniyah, Iraq Jul 2025 – Aug 2025

- Supported senior engineers with **network maintenance and site operations** during a summer internship program.
- Gained **hands-on field experience** in network maintenance, equipment configuration, and installation under senior engineers.

ENGINEERING PROJECTS

Each project is a live tool: click a name to try it.

- **AntDesigner**: Built an AI microstrip patch antenna design platform, trained on **6,048 CST simulations**, that generates antenna dimensions and predicts performance.
- **SuliNOC**: Developed an AI-powered LTE network operations center with two agents: one predicts site failures **~60 minutes in advance**, the other diagnoses outages and their likely causes.
- **Tower Studio**: Designed an interactive tower engineering platform covering configurations, equipment, power systems, microwave links, and vendor-specific infrastructure.
- **FiberLAB**: Created an interactive FTTH design and training environment with optical calculations and fault-finding practice.
- **KurdLine**: Conceptualized a network planning platform integrating fiber-optic, microwave, satellite, and 5G technologies.

CERTIFICATIONS & TRAINING

DTI Summer School 2025 (4.5 ECTS credits) | FH Münster University of Applied Sciences, Germany Aug – Sep 2025

CS50's Introduction to Programming with Python | Harvard University / edX

CS50's Introduction to Artificial Intelligence with Python | Harvard University / edX

Empower Women in ICT and Cybersecurity (18 hours) | Sulaymaniyah Polytechnic University / Meridian Jan 2025

Advanced Broadband Mapping | ITU Academy

Wireless Infrastructure Deployment and Governance | ITU Academy

TECHNICAL SKILLS

Telecommunications: Network Engineering, RF Systems, Fiber-Optic Networks (FTTH), Telecom Infrastructure

AI & Machine Learning: Python, TensorFlow, Keras, Pandas, NumPy, Deep Learning

Programming & Tools: MATLAB, Git/GitHub, CST Microwave Studio, AutoCAD

LEADERSHIP & VOLUNTEERING

Volunteer | Career Development Center (CDC), Sulaymaniyah Polytechnic University 2024 – 2026

Administration Staff | Rowad Leadership Course 2025 – 2026

LANGUAGES

Kurdish: Native | **English:** Fluent | **Arabic:** Advanced comprehension, Intermediate speaking
